Pinkerton Landcare & Environment Group Appendix: Wildlife in Pinkerton Forest 2018

Grey Kangaroos in Pinkerton Forest

A series of photos were taken by a trail camera at the two water troughs placed in Pinkerton Forest (beside the Green Shed & in Upper Pinkerton) as well as beside the Pinkerton Link / Mulla Mulla gate giving us an insight as to what happens in Pinkerton in our absence! We have also had a glimpse into night time activities in Pinkerton. The water troughs appear to be a focus of activity, both day and night. The trough beside the Green Shed especially is a focus of activity for a variety of local wildlife (native and non-native). A dramatic incident recorded a Fox in pursuit of a Possum beside the water trough. Fortunately both the possum and its young were photographed the following night so they both survived the chase!

KABV City Pride Award 2003 Winner: City Pride: *Landcare Group*

KABV Sustainability Cities Finalist 2005 Protection of the Environment Award: *Protection of Pinkerton Forest*

KABV / Sustainable Cities Award 2010 Winner *Protection of the Environment: The Sea-eagle has Landed*
